

NANOMETTS III: Drug nanoconjugates and nanovesicles for targeted therapy in disseminated cancer.

ADDRESSED PATHOLOGY:

Metastatic colorectal cancer.

GENERAL OBJECTIVE:

Generation of new nanomedicines that improve current therapies in peritoneal, liver and lung metastases of colorectal cancer, by eliminating the cells responsible for cancer dissemination.

PARTICIPANTS:

- Dr. Ramon Mangués. GOA-HSCSP
- Dr. Jaume Veciana. ICMAB-CSIC.
- Dr. Antoni Villaverde. IBB-UAB
- Dr. Ramon Eritja. IQAC-CSIC

CLINICAL GROUP:

- Dr. Ramon Mangués. GOA-HSCSP
